Submitted to members of the SEA negotiating team from members of the Sandwich School Committee negotiating team on April 3, 2008.

Members of the School Committee want it made known to the leadership of the SEA and through them; all SEA members, that the economics of this offer will, absent significant growth in State Aid for Schools and or significant growth in municipal financial contributions to the schools, necessitate regular, annual and material reductions in force.

Members of the School Committee want it made known to the leadership of the SEA and through them; all SEA members, that the School Committee has no reason to expect and no evidence to suggest significant growth in State Aid for Schools and or significant growth in municipal financial contributions to the schools for the foreseeable future.

Members of the School Committee want to remind the leadership of the SEA and through them; all SEA members, that a minimum of 31 SEA members or affiliated persons will be released under the current budget cycle.
